

Kutol Healthguard Antibacterial Hand Cleaner

Efficacy Data: In Vitro percent reductions of test organisms

Microorganism	ATCC No.	% Reduction
Bacteria: after 15-second exposure		
Enterococcus faecium (VRE) Vancomycin resistant	51559	> 99.9%
Staphylococcus aureus (MRSA) Methicillin resistant	33591	98.0%
Listeria monocytogenes	7644	> 99.9%
Pseudomonas aeruginosa	9027	> 99.9%
Salmonella typhimurium	14028	95.5%
Yeasts and Fungi: after 15 second exposure		
Candida albicans	10231	> 99.9%

Test performed by Q Laboratories, Cincinnati, Ohio. Methodology is based on ASTM Committee E35.15 standard test method "The Assessment of Microbiocidal Activity of Test Materials Using a Time- Kill Procedure".
