

Safe Reopening of Schools

Federal COVID-19 relief programs – including the CARES Act – provide funding to help schools safely reopen their doors to in-person learning. The availability and use of these funds are left to the discretion of each state’s department of education. In general, funding is for:

- K-12 schools
- Higher education institutions
- Purchase of “supplies to sanitize and clean the facilities of a local educational agency”¹
- “Providing principals and others school leaders with the resources necessary to address the needs of their individual schools”¹

New CDC recommendations to schools include building time into daily routines for students and staff to wash hands. Make sure you have enough hand soap in stock!

School districts can make the most of federal relief funding with hand hygiene supplies from Kutol. Our Health Guard® hand care products are made in the USA in our FDA-registered facility and are available for your reopening efforts:

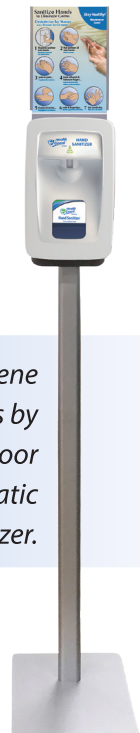

- ✓ Hand sanitizers
- ✓ No touch dispensers
- ✓ Hand hygiene stations
- ✓ Hand soaps
- ✓ Counter and desktop dispensers
- ✓ Portable pump bottles

From the CDC: Consider making hand sanitizers with at least 60% alcohol available near frequently touched surfaces and areas where soap and water are not readily available.

Easily set up hand hygiene stations in high-traffic areas by bundling our floor stand with an automatic dispenser and hand sanitizer.
