COMMERCIAL HAND SANITIZERS

For healthy facilities

Hand sanitizers provide a convenient, accessible option to reduce the spread of germs – especially when soap and water aren't available. Health Guard® sanitizers by Kutol are available in alcohol and non-alcohol formulas and are:

- ***Fast acting: kills up to 99.99% of most common germs in 15 seconds***
- ***Moisturizing with added aloe and vitamin E***
- ***NSF E3 rated for use in restaurants and food service***
- ***Manufactured in Kutol's FDA-registered, LEED® Silver Certified facility***
- ***Available in foaming, liquid and gel***
- ***Made in the USA***

Recommended by the Centers for Disease Control and Prevention for maximum hand antisepsis.

SANITIZERS

ALCOHOL

Health Guard alcohol-based sanitizers are made with 62% or 70% ethyl alcohol and available in foam and gel formulas. Derived from renewable grain alcohol, these sanitizers are USDA certified biobased products, contain no dyes or fragrances and are Green Seal® certified.

Ideal for general, all-purpose use and in facilities where highly effective hand sanitizer is needed such as hospitals and medical centers.

NON-ALCOHOL

A soft, rich foam containing no alcohol, this Health Guard hand sanitizer is safe and non-flammable. It does not dry out skin and is dye free. The formula contains the active ingredient Benzalkonium Chloride but with a light, linen fragrance, there is no medicinal smell.

Ideal for schools, entertainment venues, long term care facilities and public venues with health and safety concerns or that restrict alcohol products.

Non-alcohol sanitizers are gentle on hands and can help prevent dry, irritated skin.

KUTOL
Hand Care Specialists

Fit conveniently on desktops and service counters

PORTABLE CONTAINERS

From small bottles that fit in a pocket or purse, to bulk gallons

Details about Kutol's dispensing systems are available at Kutol.com/dispensers.

HAND HYGIENE STATIONS

Encourage hand sanitizing throughout facilities with a dispenser floor stand. The matte silver flat-post design is contemporary, stylish and easy to assemble. A sign holder at the top of the stand can be customized with a message, logo or used with the hand sanitizing card that is included.

Ideal for entrances and exits, lobbies, waiting and meeting rooms, hallways and other high traffic areas where soap and water aren't available.

The World Health Organization recommends placing hand sanitizer dispensers in prominent places around the workplace and making sure they are regularly refilled for the health of employees, contractors and customers.
