

# COMMERCIAL HAND SANITIZERS

For healthy facilities

Hand sanitizers provide a convenient, accessible option to reduce the spread of germs – especially when soap and water aren't available. Health Guard® sanitizers by Kutol are available in alcohol and non-alcohol formulas and are:

- ▶ **Fast acting: kills up to 99.99% of most common germs in 15 seconds**
- ▶ **Moisturizing with added aloe and vitamin E**
- ▶ **NSF E3 rated for use in restaurants and food service**
- ▶ **Manufactured in Kutol's FDA-registered, LEED® Silver Certified facility**
- ▶ **Available in foaming, liquid and gel**
- ▶ **Made in the USA**

Recommended by the Centers for Disease Control and Prevention for maximum hand antiseptics.

# SANITIZERS

## ALCOHOL

## NON-ALCOHOL

Non-alcohol sanitizers are gentle on hands and can help prevent dry, irritated skin.

Health Guard alcohol-based sanitizers are made with 62% or 70% ethyl alcohol in foam and gel formulas. Derived from renewable grain alcohol, these sanitizers are USDA certified biobased products, contain no dyes or fragrances and are Green Seal® certified.

*Ideal for general purpose use and in facilities where highly effective hand sanitizer is needed such as hospitals and medical centers.*

A soft, rich foam containing no alcohol, this Health Guard hand sanitizer is safe and non-flammable. It does not dry out skin and is dye free with a light linen scent. Instead of alcohol, the active ingredient is Benzalkonium Chloride.

*Ideal for schools, entertainment venues, long term care facilities and public venues with health and safety concerns or that restrict alcohol products.*

## Dispensing systems for Health Guard hand sanitizers:

### WALL MOUNT DISPENSERS

Available in no touch and manual in a variety of colors

### FLOOR STANDS

Lightweight and great for high traffic areas

### COUNTER TOP STANDS

Sit conveniently on desktops and service counters

### PORTABLE CONTAINERS

From small bottles that fit in a pocket or purse, to bulk gallons

Additional dispenser details are available at [Kutol.com/dispensers](http://Kutol.com/dispensers).

## HAND HYGIENE STATIONS

Encourage frequent hand sanitizing by adding no touch dispensers to portable floor stands and placing them throughout the facility. These sanitizing stations serve as a reminder to practice good hand hygiene.

*Ideal for entrances and exits, lobbies, waiting and meeting rooms, hallways and other high traffic areas where soap and water aren't available.*

*The World Health Organization recommends placing hand sanitizer dispensers in prominent places around the workplace and making sure they are regularly refilled for the health of employees, vendors, visitors and customers.*
